Brush Chipper

Model C3^e

clean
& green

The Hansa Model C3e is an essential tool for the suburban garden, useful all year round as you do your winter pruning, spring cleanup, or trimming back in summer – plug it in, turn it on and chip away.

If you own a domestic property with trees, flowers or a vegetable garden you will find the Hansa C3e an ideal sized, compact and quiet, chipper shredder. The cantilever rotor design allows fibrous materials such as palm fronds to be processed, without running the risk of wrapping around a shaft.

FEATURES

- One in feed chute with large opening at a convenient operating height
- Powered by 2HP single phase electric motor
- Capacity of 30mm branch diameter
- Push button start with thermal overload
- Conforms to ASNZS62841.1-2015 standard
- Discharge out the side directly back onto your garden or stockpile or into optional bag
- Solid housing construction of 5mm steel plate
- Easy access to cutting blade – remove four bolts and everything is accessible
- Easy to transport, well balanced on large solid rubber wheels
- Quality powder-coated finish
- 12-month warranty (extended warranty to 24 months on registration)

The best chippers for any application.

CHIPPERS

Brush Chipper Model C3e

The Hansa Brush Chipper Model C3e will process all your unwanted garden refuse, such as pruning's, stalks, vines, weeds, roots, vegetable matter and kitchen waste into natural compost and/or free mulch.

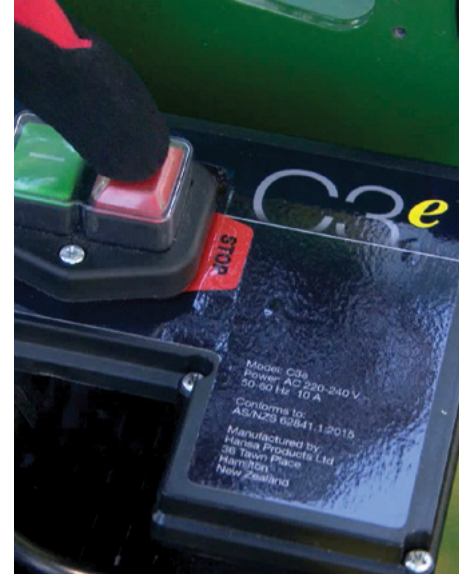

The output is of fine and even texture. Branches are chipped into 6 - 10mm particle size, optional bag to contain discharged mulch. Recycle your waste and return it to your garden as rich organic fertilizer.

Discharge to the side, directly back onto your garden or into optional bag attachment, no screen to cause blockages.

Model C3e in action, one in-feed chute – will handle fibrous material such as palm fronds

Electric powered, clean & green - plug it in, turn it on and chip away

CONSTRUCTION

- Housing built of solid 5mm steel plate.
- The cutting blade shears the material against an adjustable hardened counterknife, or anvil.
- This action will work just as efficiently in 10 years time as on the first day, provided the blade is kept sharp.
- No plastic components, built to last – simply the strongest.

SPECIFICATIONS	Weight (kg)	Height (mm)	Width (mm)	Length (mm)	Approx. Capacity*
2HP single phase electric	55	1040	520	1040	30mm branches

* depending on the type and hardness of the wood

When you compare different makes of machines, be aware, as some manufacturers rate their capacity by the size of the opening, which is misleading. Through a 30mm opening you can practically feed only a 10mm branch. Hansa inlet openings are much larger than the maximum recommended branch diameter.

Please contact us for details if you are looking for a larger or smaller model. Visit our website for our full product range and videos of the machines in action.
